Global Uniface Challenge: RAD Race in the Cloud Apr 16

We wrapped up the judging of the Global Uniface Challenge this week. This was our cloud based 'RAD Race', and was an fascinating experience, with teams from Japan, India, US, Netherlands, Germany, Italy and the US registering for a 48 hour Uniface marathon. The judging was really interesting, very different application designs and very different ways of presenting. What it really bought home to me was how differently we all view the important aspects of application development. User experience, productivity, functionality, technical implementation, and so forth. Really, I knew this, we run an internal RAD Race every year, with ... Continue reading →

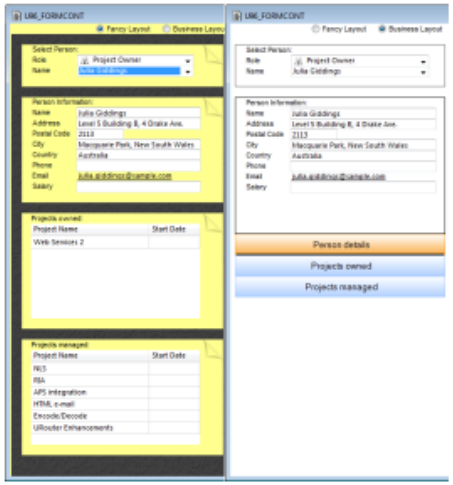
GUI Sample: Form Containers



GUI Sample: Form Containers
In Uniface 9.6 the Form Container widget has been introduced. It allows you to include a Uniface Form within another Uniface Form.

This sample shows some of flexibility that Form Containers give you in designing your user interface. It also shows that reuse of code can be improved by including the same Form in multiple Form Containers.

Minimum required Uniface version: 9.6.01, Patch X104

GUIサンプル：HTMLウィジェットとJavaスクリプト

Uniface9.6で新しいHTMLウィジェットが紹介されました。それはUniface Windowsアプリケーションの中にHTMLテキストあるいはWebページを使うことが可能になります。

このサンプルはHTMLウィジェットの中でJavaスクリプトとUnifaceブロックコードの間でどのように相互作用がされているのかを示します。

必要最低 Uniface バージョン: 9.6.01

Click this to download

UNIFACE
USER EVENTS

Download

- Is a ZIP file
- Uniface Export
- Readme file
- Images
- Test data when needed

Installation

- Instruction are in the Readme
- So read online Readme first!
- We tried to make it as easy as possible
- But customer development environments all have different setup, so no full automatic installation possible.

DEMO

Thanks
