Description: This is a sample to be uploaded to the community samples area on the Uniface.info website.

Key words are useful, they will be searched.

Adding a file to be uploaded should be zipped.

The max file size is set to 10mb. If this proves to be to small a size, tell us, we can get it increased.

The file types are limited to image types, text files and zip files. This was consciously taken as we would prefer uploads are zipped.

Note: Please ensure that you are scanning files for viruses and other nasties. We do what we can, but we are all responsible.

Uniface takes no liability for the content of samples. They are downloaded and used entirely at your own risk.

Call Tracking

Accessed from Uniface.info

- ▲ We will continue to use the CASE360/SFDC combo
- ▲ We have implemented our own SFDC instance
- ▲ Customer data was moved into the new instance
- ▲ Call logging and tracking functionality is being discontinued
 - ▲ Calls can only be logged by email (uniface.support@uniface.com)
 - ▲ We are looking into options for alternatives
 - ▲ We will not have something in place in 2014

Uniface Share

Lead to quickly share big files

Uniface and License Management

- Uniface has a source license for DLM
- Uniface' s DLM
 - Integrated into our processes 
 - source control 
 - Automated Build 
 - Released / Tested
- CLTD App (issuing/managing licenses)
 - Migrated 
 - Uncoupled from Oracle Financials/dbms 

LM – what's it going to look like?

- Version number 9.0
- Enable version number check on client
- Using DLM 9 is not mandatory
- Only use if you need to use it!
- Fresh installation
- Under guidance from Uniface
- Directory structure (still Compuware)

License Management (Future thinking)

New name (ULM)

- different version number than 9.0

New licenses required

- Expect with Uniface 9.7

Not started investigating new functionality

- Radar items
 - CPU core check – license compliancy
 - Network chattiness (?)

Thank You!
