Headline: Aantal karakters in info veld correcties te beperkt

Description:

Release notes

Wanneer men in de correcties het veld 'vrije tekst' opent via ctrl Z dan verkrijgt met een groot geel scherm waar info kan worden weggeschreven. Het aantal karakters dat hier kan worden weggeschreven is echter (TE) beperkt en het is ook niet mogelijk om een nieuwe zin op een volgende lijn te beginnen met de return (enter) toets.

Idem voor het veld 'opmerkingen' bij de knop afrekening in de correcties. Hier werkt de return (enter) toets wel maar het aantal karakters dat kan worden ingegeven is ook hier te beperkt.

Gelieve te voorzien dat er in beide gevallen veel meer info kan
