Drie oplossingen:

- Scherm(en) herbouwen → te duur
- Latency verlagen → onmogelijk
- Uniface Anywhere → POC

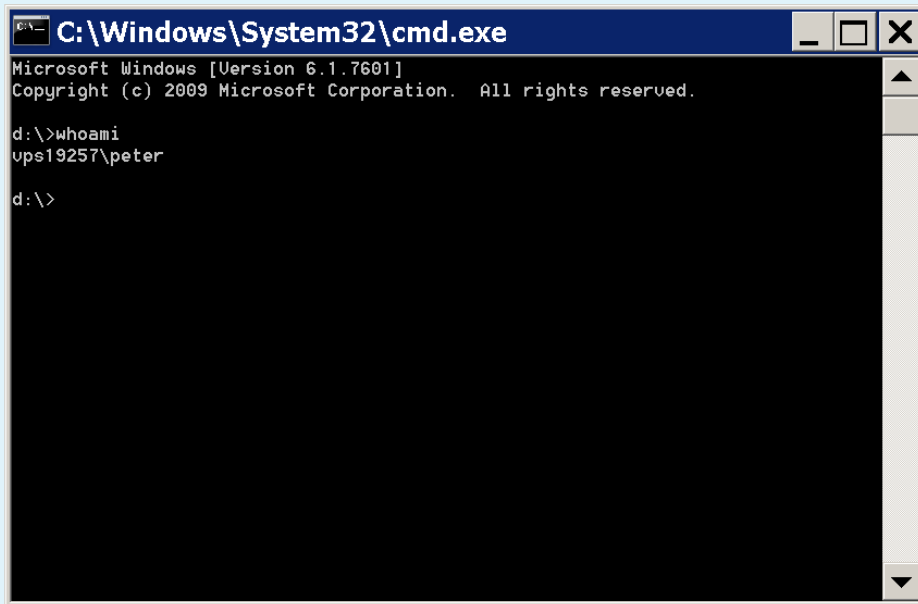

The screenshot displays the Remote Desktop Connection Manager v2.7 interface. The desktop background is blue and features several icons: Recycle Bin, Uniface Anywh..., Google Chrome, SoapUI 5.2.0, and FileZilla Server Interface. The Cluster Manager window is open, showing the 'Applications' tab. The 'Current Host' is 'vps19257'. The 'Uniface Anywhere Hosts' tree on the left shows 'All Hosts' and 'vps19257'. The 'Installed Applications' table lists the following:

Name	Path
CMD	C:\Windows\System32\cmd.exe
DiSys DN13 (UA)	D:\disys\ontw\Programs\DiSysClient\U96\common\bin\uniface.exe
IDF	D:\disys\ontw\Programs\DiSys\U96\common\bin\idf.exe

Buttons for 'Add...', 'Remove', 'Duplicate...', 'Rename...', and 'Properties...' are located to the right of the 'Installed Applications' table. Below this, the 'Application Users/Groups' table shows the following:

Name	Control
BUILTIN\Administrators	Read
BUILTIN\Users	Read
NT AUTHORITY\SYSTEM	Read
NT SERVICE\TrustedInstaller	Full Control

A 'Properties...' button is located to the right of the 'Application Users/Groups' table. The status bar at the bottom of the Cluster Manager window shows 'Press F1 for Help.', 'vps19257', 'CPU: 0%', 'MEM: 0%', 'Sessions: 1', and 'Processes: 4'.

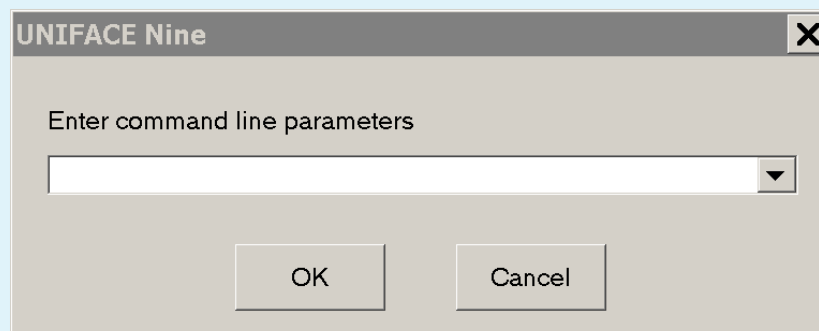

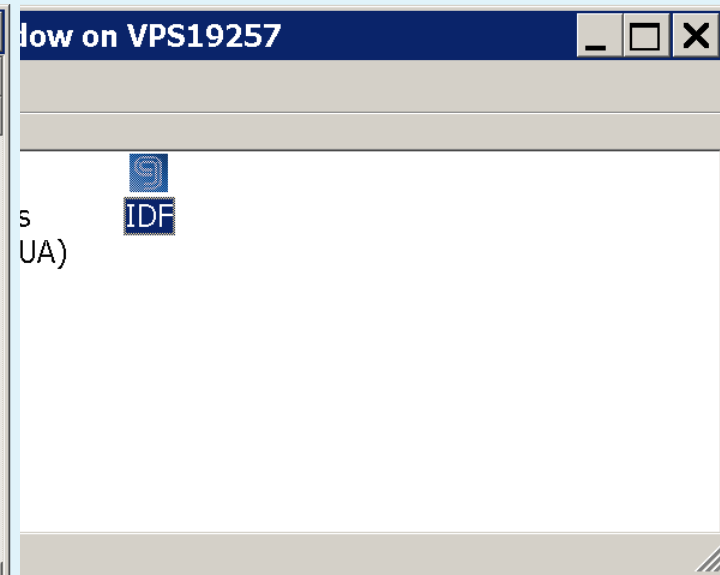

C:\Windows\System32\cmd.exe
